

The downstairs family room has cabinets, plentiful counter space, a sink and a wine cooler. Placed near the theater and the wine cellar it provides an ideal place for entertaining.

A nearby bedroom has been used as an exercise room

On the main floor the living room and dining room are styled as an elegant country estate. An ornately carved stone fireplace mantel provides perfect balance to the rustic ceiling beams.

The large master suite bedroom has room for relaxing and reading. A fireplace gives the room a warm inviting ambiance.

The master bath features a stone tile floor, a large tub set in a stone tiled platform, a large glass doored shower having stone tiled walls with tile insets, and a stone slab topped antiqued vanity with dual sinks.

A small creek with a tree lined stream bed makes the spacious backyard feel like a park.
