

The open dining/living room greets you when you enter your home. Filled with natural light, with a partially enclosed patio located at its side and a partially enclosed deck at the back, this area is the inviting center of home activities. The kitchen is just through a wide passageway from the dining area and also has a lovely pass-through. Modern appliances, counter tops, and cabinets along with a breakfast area at one end make the kitchen a great place to prepare meals.

The master bedroom is ample sized, has a bath en-suite with dual sinks & shower over tub. The master bedroom opens up to the partially walled side patio which is visible through the window of the office.

The third bedroom is currently set up to be a wonderful office, secluded from the main public areas, with double doors leading to the entrance of the master bedroom. It could provide more privacy to the bedroom by perhaps opening a doorway to the main hall or adding doors between it and the master bedroom.
