

DELIGHTFUL HOUSE NEAR STANFORD
PERFECT FOR THOSE WHO
HAVE EVERYTHING

From the mind of famed architect, Scott Mitchell, comes this serene 3 bedroom/1.5 bath single family house with a semi-open floorplan. Built with floor to ceiling windows, natural light fills this tranquil residence. First floor consists of a spacious open floor plan, half bath connected to a laundry room, the first bedroom and an updated kitchen including a new countertop, stove, and microwave.

Second floor gives access to 2nd bedroom and the master suite. The suite features a built in queen platform bed, stand alone fireplace, library/lounge nook, built in desk, and a private outdoor deck where you can pick delicious ripe figs in season. There is a delightful floating spiral staircase that leads to the attic which includes a large bonus room and a tiled European efficiency bathroom.

The house has been freshly painted along with new carpeting and flooring. The property has a gated and smooth-stoned filled run for dogs, and a very large 2 story garage with a private deck. One block from Stanford University, a short walk from Escondido Elementary School, and a short drive to Caltrain and downtown Palo Alto.
